About Me

A Computer Science graduate passionate about software development and data analytics. Proficient in Python, Java, and data analysis tools such as SQL, Power BI, and Tableau. Committed to continuous learning and applying knowledge in real-world scenarios. Eager to contribute and grow within a dynamic team.

Skills

- Strong foundation in programming languages (C, Java, Python)
- Web development using HTML, CSS, JavaScript, and Node.js
- Data analysis and visualization with Power BI and Excel
- Database management and SQL query optimization
- Problem-solving with data structures and algorithms
- Quick learner with ability to adapt to new technologies
- Effective communication and teamwork abilities
- Test Automation using Selenium WebDriver with Java

Language

- English
- Hindi

Education

- Bachelor in Computer Application** 2022 - 2025
completed my Bachelor's in Computer Application from Utkal University, Bhubaneswar with a CGPA of 8.57.
- Higher Secondary Education** 2020 - 2022
completed my High School from Samntha Chandra Sekhar (A) college, puri with a percentage of 80.33.

Certifications

- Cybersecurity Analyst Job Simulation - Forage
- AI Foundations Associate Certification By Oracle

Internship

- Machine Learning Using Python | NIELIT**
Completed an ML-focused internship where I developed a Car Sales Analysis project using Python. Performed data preprocessing, exploratory analysis, and applied machine learning algorithms to predict sales trends and extract meaningful insights from automotive data.

Projects

- YatraSaathi - Travel Website**
Built a full-stack platform connecting tourists with local guides in Odisha. Developed the frontend using HTML, CSS, and JavaScript, with Node.js and MongoDB handling backend operations. Implemented tour booking, guide profiles, and search features to promote sustainable tourism while supporting local employment.
- Bank Analysis Dashboard | Python, SQL, Power BI, Excel,**
Built an end-to-end banking analytics solution analyzing customer transactions and account trends. Cleaned and processed data using Python and SQL, then created interactive dashboards in Power BI and Tableau to visualize financial patterns, transaction volumes, and customer insights for better decision-making.
- Quiz Application - Java**
Developed a Java-based Quiz Application using AWT and Swing. Implemented multiple-choice questions, user response validation, and score calculation using core Java and OOP concepts. Designed a simple and user-friendly GUI to improve usability and interaction.
